

Saturn is the sixth planet from the Sun and the second-largest in the Solar System, after Jupiter.

It is a gas giant with an average radius of about nine times that of Earth.

It only has one-eighth the average density of Earth; however, with its larger volume, Saturn is over 95 times more massive.

Saturn is named after the Roman god of wealth and agriculture; its astronomical symbol ($\text{\texttt{h}}$) represents the god's sickle.
